First, I had but, awful relationships with this movie cast but now returning to my past, the main thing was that I really didn't catch up a little thing. So back to my dream profession, I consider that this profession will be my dream since my relatives and parents really wanna see me with ordinary professions like, such as economist, doctor, tutor, jobs related to engineering stuffs. Definitely this dream born with not merely mission, it comes from not only Marvel but also tiktok. I've been using tik tok for many years. And one of my favourite stuffs is it edits. 1. I have a big range of hobbies, I have tried as a child, the first thing I have been doing since like I was 9, it's an embroidery, I still have some items for that, from time to time I practise it. The second thing, I keep doing, is sewing, kinda related to embroidery, I didn't start ~~it~~ at a young age, but I'm quite good at it, other ones are ball games, particularly football and volleyball. Football is the thing I gave up since I have quite weak legs and kicking the ball in the right direction is a trouble. But volleyball, I still practise it, oftenly on P.E lessons. For me a girl of this type of sport is a piece of cake. I'm a stubborn person, so if I start something, or I will get a good result, or I will get a total failure.

The next hobby, I want to learn is something in IT-sphere, because it's about the future, and if it's my hobby, I won't be so hating it, when it's hard.

My future profession

I'm a schoolkid, and i'm graduating this year, that's why i have been thinking on it left three monts. As the main subjects, I have chosen English and World History, the two ones i like mostly. With this choice i can be an English teacher, or a Politics (international relations). These two professions, i currently hoped on. But as a kid i dreamed to be an actress, and i hope it will come true one day, however i know that i won't be a teacher my entire life, i will change it during my life, or next seven months.

Our old school was older than me in 4-5 times.

But our new school is great, we have a lot of different classrooms, a hundred of laptops for all student. It has 3 floors, and some times it's really hard to get to one point from another. We also have a library, that could sound not really cool, but for us it's first time when we have a silence place.

Honestly, I hate this weather. I live in Kulsary, and it has terrible weather. The most terrifying time there, is ~~summer~~ summer. I hate it cause it's usually 40-45° at the middle of summer. In some places it even can go to 50°. It's very hard to survive summer at home, but at the street it's impossible. I literally feel how sunshine destroy my skin.

In the winter it much easier to survive but it still - 30° and a tons of snow.

For me it's important to know about your own country history. That show how intellectual you are and also your patriotism, which is important to be in our modern world.

15 I want to be famous.

Today, in our modern world, most of all people want to be famous, a celebrity and etc. My opinion is that they want to be famous because of fans and money.

And that's totally okay. But I think that famous people should speak up about important problems, cause they have a huge auditory.

I also want to be famous. That give me not only a fans, fame and money, but also a chance to speak up about modern problems. If only I would have a possibility to be a famous, I will do it no matter what. Who knows, maybe in future that will happen and I will be trying to find a solution of problems with help of my fans.

For this profession I need to know math and geography. This two items are my weak side. But now I'm trying to study. I'll go into any trouble that I can face to. And I'll manage them all. Because if I choose this profession, I'll do everything. Math is the hardest thing, that I decided to study. I think even when I studied english, I didn't forced the trouble like math.
